DETAILED ACTION

Allowable Subject Matter

1. The indicated allowability of claims 24-26,28 and 35 is withdrawn in view of the recently discovered reference to Hosain et al. (Hosain), US Patent No. 7,092,696.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 24-26,28 and 35 are rejected under 35 U.S.C. 102(e) as anticipated by Hosain et al. (Hosain), U.S. Patent No. 7,092,696.

Regarding claims 2-13,15-22,29,30,32-40,43-49 and 60-69, Hosain discloses an accounting method for crediting an account associated with a network access node, comprising (and a portable device configured as a repeater):

Art Unit: 2617

means for receiving a data signal wirelessly;

means for forwarding the data signal wirelessly to a network user node; and

means for providing account crediting information to an accounting system,

wherein the account crediting information represents a credit to be recorded for
an account

associated with the portable device',

means for providing second account crediting information to the accounting

system, wherein the data signal is provided by an Internet service provider,

wherein the second

account crediting information represents a second credit to be recorded to an
account associated

with an Internet service provider (Col. 3, line 42 to col. 8, line 67 and see Figs.
2 and 3).
